Hollard Investments Purpose

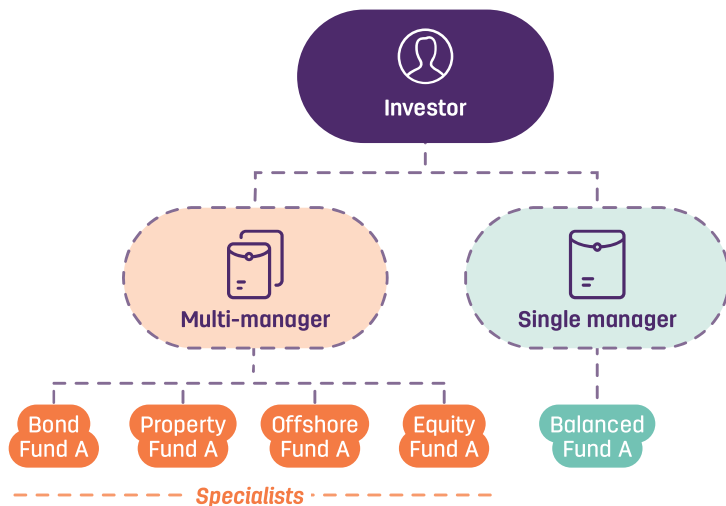

We partner with our clients to deliver a **win-win situation** for all.

We strive to help our clients **create and secure a better future.**

Diversification is based on the age old adage of **not investing all your eggs in one basket.**

Multi-management enhances the benefit of diversification. Asset managers tend to have differing views of the investable universe and therefore they will outperform or underperform at different times.

We provide exposure to a range of specialist managers per sector, which we combine in the most optimal way, to provide clients with a well diversified solution that delivers returns in a consistent and incremental manner.

Our Investment Philosophy

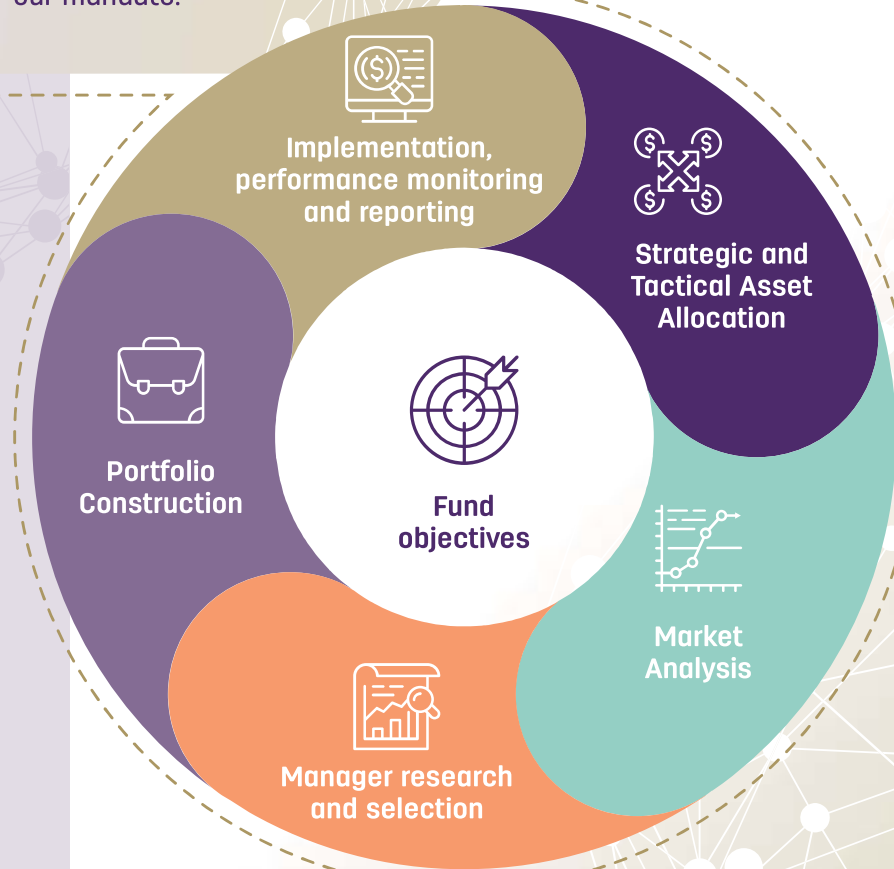

Our aim is to compound incremental outperformance over time and do so by taking less risk than the market.

We believe that by controlling the volatility within our solutions, we can smooth returns and provide more consistent outcomes for clients.

We seek to avoid unnecessary volatility, in delivering our solution, that helps us avoid what we term volatility tax – the underperformance investors experience in the presence of excess volatility.

Our commitment to our **Investment Process** enables us to trust in our ability to consistently deliver on our mandate.

Our Fund Range

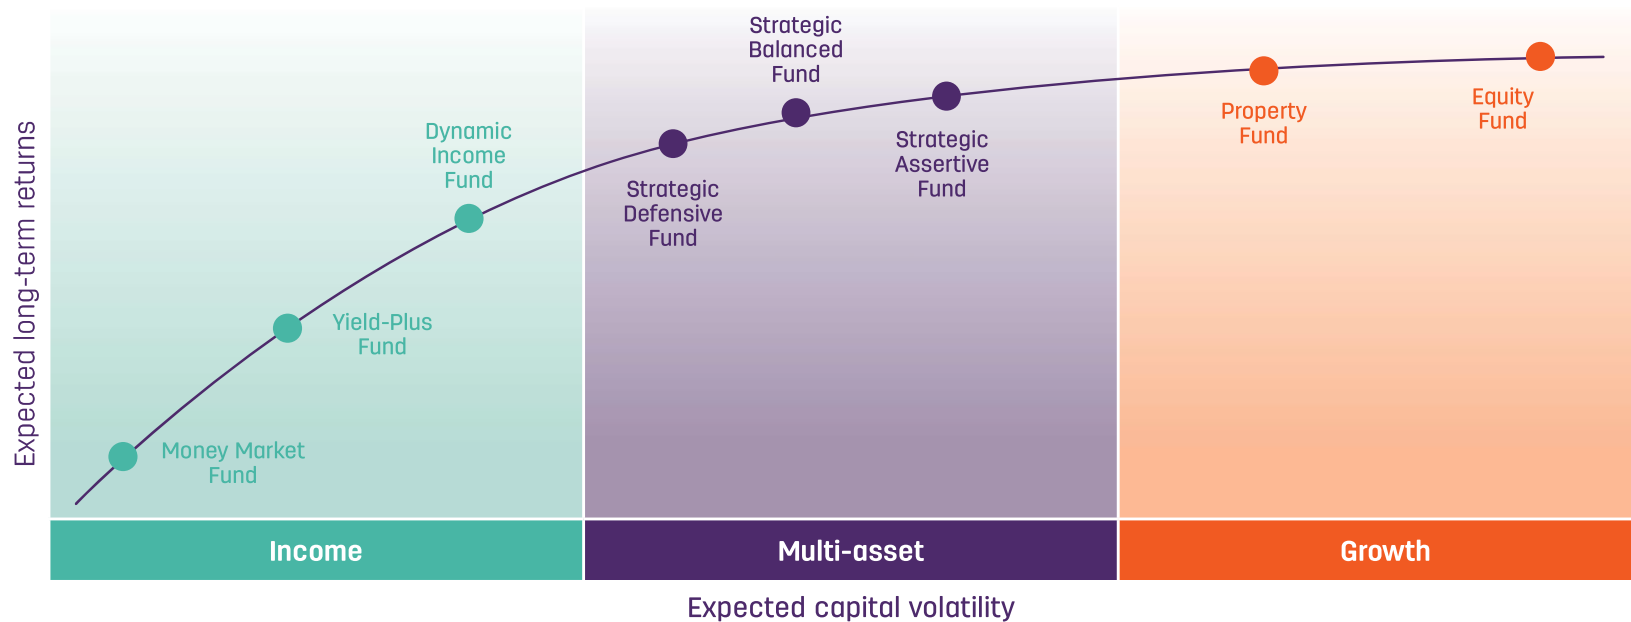

Simplicity – Offering basic, core investment products that are investable solutions for clients’ needs is our focus.

Purpose – Our range of unit trust funds is designed to give clients a flexible set of the building blocks required to achieve their investment objectives.

Quality – We aim for ‘best in class’ asset allocation and manager selection decisions, based on diligent quantitative and qualitative research.

Reliability – Our approach to risk is to take as little as possible, and only as much as necessary to achieve defined investment objectives for our clients. This means that we prefer consistent incremental performance to occasional stellar performance.

Collective Investment Schemes (CIS) are generally medium- to long-term investments. The value of participatory interests may go down as well as up and past returns are not necessarily a guide to the future. CISs are traded at ruling prices and can engage in borrowing and securities lending. The CIS may borrow up to 10% of the market value of the investment fund to bridge insufficient liquidity. Different classes of units apply to investment funds, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the management company. The manager has a right to close portfolios to new investors in order to manage them more efficiently in accordance with their mandates.
